

## August and Yale Home Partner with Jervis Systems to Automate Property Access with Secure PIN Codes

Partnership Allows for Easier & More Secure Property Access for Hosts, Property Managers, and Guests Everywhere

ASHBURN, Virginia., July 8, 2022 - Jervis Systems, an access management platform, along with August and Yale Home, leading providers of smart locks and smart home access solutions, are announcing their integration. Now, rental hosts and property managers can easily set up secure, keyless access for their guests, cleaning companies, and maintenance personnel on properties using their Yale Assure and August Wi-Fi Smart Locks. Hosts and managers can import their select August and Yale smart locks to the Jervis Systems dashboard to automatically create PIN codes for every upcoming reservation and share those PIN codes with guests.

Over the last few years, contactless check-in and property access have become more commonplace with vacation rentals. According to customer research by PointCentral, not having “basic” smart tech in place for a rental, such as keyless entry, creates a negative first impression for a guest. According to Booking.com, over 60% of travelers report that tech solutions, like contactless check-in or security-related solutions, help alleviate their concerns surrounding health risks and travel anxiety. Today, more

hosts and property managers are turning to keyless access to provide added convenience and safety. However, they encounter the technical headache of figuring out how to set up and manage automated property access.

The Jervis Systems partnership with August and Yale helps to bridge the gap between guests seeking security and convenience in their rental stays, and property owners and managers looking to easily set up and offer secure, keyless access. Using Jervis Systems, hosts and property managers can also remotely monitor and manage property access from one place for their August and Yale Assure smart locks. Additionally, Jervis Systems provides unique access options for the smart lock user, including Text, Call, and Voice, alongside the Jervis Systems mobile app.

### **How It Works**

1. Set up a Jervis Systems account.
2. Connect your Jervis Systems account with your property management system (PMS) of choice.
3. Import your August or Yale smart lock(s) in the Devices section of the Jervis Systems dashboard.
4. Assign your smart lock(s) to your rental properties.
5. Jervis Systems will generate SET PIN codes for all your upcoming reservations.

Additionally, customers can choose to set up offset times for their properties. If a guest requests early check-in, late check-out, or extends their reservation, property access will automatically be adjusted for the duration of the updated reservation.

### **Compatibility**

Automating property access using the SET PIN code support with Jervis Systems requires using either the August Wi-Fi Smart Lock or the Yale Assure Lock with Wi-Fi.

“We are excited about our partnership with the August and Yale team! We know that we are creating better peace of mind for hosts, property managers, and guests by working closely with a trusted brand that believes that security goes far beyond keeping a home or property safe and involves giving people the right access at the right times. That’s what Jervis Systems is all about,” said, Bobby Varghese, CEO of Jervis Systems. “In the near future, we plan to expand Jervis Systems’ support of August and Yale products to include commercial locks and smart delivery boxes.”

Access to Jervis Systems starts at as little as \$5 per device, per month with the Property Management System (PMS) Plan. The company is currently offering a 14-day free trial to new customers. To learn more about Jervis Systems, visit [www.Jervis.Systems](http://www.Jervis.Systems).

### **About Jervis Systems**

At Jervis Systems, we are passionate about perfecting rental stays. Our goal from the start has been to create a community of property owners and managers that care about creating 5-star experiences for their guests. We created our platform to help property managers everywhere enhance guest satisfaction while avoiding the technical hassle and headache of managing property access. We connect top-rated smart locks and device brands to automate access securely and inexpensively for guests,

cleaning companies, and maintenance personnel. Jervis Systems makes property access keyless, simple, and secure - all from one place. Start your free trial today at <https://www.jervis.systems/>

### **About August Home**

August Home creates innovative products and services to help simplify your life by letting you conveniently control access to your front door from anywhere, while providing peace of mind through visibility into who is coming and going.
